

Where Security Means More

Navigating the State of NY Cybersecurity Regulations

The New York State Department of Financial Services announced a series of new rules strengthening cybersecurity requirements.

Where Technology Means More®

What do the NYS cybersecurity regulations mandate?

Cybersecurity Program

- Organizations should have a comprehensive Cyber Security Program that is designed to protect the confidentiality, integrity, and availability of its information systems.

Cybersecurity Policy

- Organizations should implement and maintain written policies and procedures for the protection of its information systems.

Chief Information Security Officer

- Organizations should have a designated qualified Chief Information Security Officer to enforce the Cyber Security Program.

Penetration Testing and Vulnerability Assessments

- A plan should be put in place for Annual Penetration Testing and Bi-Annual Vulnerability Assessments of its information systems.

Training and Monitoring

- Organizations should have a holistic Cyber Security Awareness Training program as well as the ability to monitor its information systems for authorized user activity and detect unauthorized access of, or tampering with information, in which users are not authorized.

These are just some of the mandates the Department of Financial Services is requiring of effected companies. For a full list of deadlines and requirements...

Put the power of a virtual CISO on your side

One of the mandates of the New York Department of Financial Services cybersecurity requirements is for financial firms to designate a Chief Information Security Officer.

DID YOU KNOW YOU CAN OUTSOURCE THIS CRITICAL ROLE?

To help you meet this requirement, ePlus offers our Virtual Chief Information Security Officer (vCISO). This seasoned security executive has hands-on technical expertise to evaluate and help drive your information security and compliance programs—and those outlined in the new cybersecurity regulations.

The time is now...

Assess and augment your IT security risks, policies, and procedures—and be prepared for this annual requirement.

THERE ARE MANY QUESTIONS TO ANSWER

Do you have the internal resources available to establish an appropriate cybersecurity program?

What elements must be included in your cybersecurity policy?

Who will you appoint as your Chief Information Security Officer, or does a virtual CISO makes sense?

How do you ensure the security of information shared with third parties?

What security assessments are critical to your company?

Put ePlus' know-how to work for you.

Leverage our national pool of security experts and dedicated local teams throughout New York state.

Build lowest common denominator regulatory compliant landscape definition

Gap remediation plan to include: level of effort, cost magnitude, timeline, and resource allocation

High-impact NY regulation compliance solution, no overlap with your current compliance system

Gap analysis of NYS Financial regulations in alignment with your regulatory environment

Implement necessary security controls to support your NY regulatory financial compliance

Contact ePlus to learn more about how we can help you
comply with the NYS cybersecurity requirements.
